

Chemist

Location: King of Prussia, PA

Job Description

Fox Chase Chemical Diversity Center, Inc. (www.fc-cdci.com) is an early-stage translational research company focused on the discovery of new therapeutics to treat disease.

We work with a variety of academic and biotechnology partners in a collaboration-based environment. FCCDC is an equal opportunity employer.

The Scientist will be involved in the design and synthesis of compounds, and help to drive a therapeutic project toward a drug candidate suitable for development recommendation. The position is lab-based and will involve synthetic chemistry as well as analysis and purification.

Qualifications

- Ph.D. in Organic Chemistry with experience in the use of new and established chemical reactions, literature searching, and proper archiving of notebooks and data
- Medicinal Chemistry experience may be a plus.
- Working knowledge of standard chemical database tools such as Scifinder and/or Reaxys
- Have demonstrated the ability to drive projects as evidenced by publications in peer reviewed journals

Interested candidates should send a CV and cover letter to:

Allen B. Reitz, Ph.D.

Chief Executive Officer
