

Postdoctoral Research Fellow, Chemistry

Location: King of Prussia or Doylestown, PA

Job Description

Fox Chase Chemical Diversity Center, Inc. (www.fc-cdci.com) is an early-stage translational research company focused on the discovery of new therapeutics to treat disease.

We work with a variety of academic and biotechnology partners in a collaboration-based environment. FCCDC is an equal opportunity employer.

The position is lab-based and will involve synthetic chemistry as well as analysis and purification.

Qualifications

- Recent PhD in Chemistry right out of graduate school or with at most one Postdoctoral Fellowship, with experience in the use of new and established chemical reactions, literature searching, and proper archiving of notebooks and data
- Working knowledge of standard chemical database tools such as Scifinder and/or Reaxys
- Have demonstrated the ability to conduct laboratory research in a safe and productive manner
- Publications and presentations in relevant journals are a plus

Interested candidates should send a CV and cover letter to:

Allen B. Reitz, Ph.D.

Chief Executive Officer
